High Speed Steel British Standard Pipe Taper Taps (BSPT) are the European equivalent of American Standard Taper Pipe Taps (NPT) and are sometimes referred to as Metric Taper Pipe Taps. They are designed for tapping ferrous and non-ferrous pipe fittings used to connect pipes carrying fluids or gases. They require a sealant such as Teflon tape or pipe joint compound to prevent leakage of fluids or gases. (BSPT) taps are used for work requiring ground thread accuracy and performance.

High Speed Steel British Standard Pipe Parallel Taps (BSPP) are the European equivalent of American Standard Straight Pipe Taps (NPS) and are sometimes referred to as Metric Straight or Parallel Pipe Taps. They are designed for tapping holes or couplings for low pressure work that will adjust at assembly to the taper of external threads. A sealant must be used to secure a pressure-tight joint.
