SPUR BRAD POINT

High Speed Steel and Carbide Tipped Brad Point Dowel Drills with 7/16"-14 Threaded Shank are designed to be used in machines with threaded spindles. They will drill smooth, accurate holes in wood with minimum tear-out. Center spur point holds drill on target and prevents walking when two cutting spurs make contact with the surface, so even overlapping holes can be drilled. Drills are made of high speed steel and will stay sharp much longer than carbon steel drills. Carbide tipped sizes stay sharp 10 to 20 times longer. Used in industrial applications.

**Right Hand Sizes 1/8" to 1" Dia.**
